METAL PROGRESS®

Subject Index

MID-JUNE-DECEMBER 1985, VOL 128, NO. 1-8

In the index listing for each article, the first number indicates the issue number, the second number the page in that issue. Issue numbers are: 1, *Materials & Processing Databook* (not indexed); 2, July; 3, August; 4, September; 5, October; 6, November; 7, *Heat Treating Buyers Guide and Directory* (not indexed); and 8, December.

ALLOY STEELS

Comparing a Split Heat of ESR/VAR 4340, by Charles F. Hickey Jr. and Timothy S. Thomas 5-69

Japanese Technology: Air Melted Steel With VAR Quality, by Harry E. Chandler 5-55

ATMOSPHERES

Using Nitrogen Atmospheres in Glass-to-Metal Sealing, by Jerome J. Schmidt and Jerry L. Carter 2-29

BIOGRAPHY

John W. Pridgeon: New President of ASM, by William D. Manly 8-46

CARBURIZING

Troubleshooting Problems in Heat Treating Gears, by Justus A. Parrish 4-49

CAST IRONS

Austempered Ductile Iron Combines Strength With Toughness and Ductility, by Richard B. Gundlach and Jay F. Janowak 2-19

CLAD METALS

New Clad Metal Concepts for Electronic Packaging, by Richard A. Campo 3-23

COMPUTER APPLICATIONS

European Technology: Two Techniques for Predicting Hardness for Carburizing Steels, by Harry E. Chandler 4-91

CONTINUOUS CASTING

European Technology: Reduction Ratios in Continuous Casting: How Important Are They?, by Jean-Claude Brunet 5-45

CORROSION

European Technology: Ferritic Stainless Steel Combats Chloride Corrosion, by Harry E. Chandler 5-63

New Stainless Steels for the Process and Power Industries, by Michael A. Streicher 5-29

DATASHEETS

Properties and Applications of Beryllium and Beryllium Alloys 6-56

DUCTILE IRON

Austempered Ductile Iron Combines Strength With Toughness and Ductility, by Richard B. Gundlach and Jay F. Janowak 2-19

EDITORIALS

Alternative to Aliquippa, by Donald F. Baxter Jr. 3-17

Check Out Warm Forging, by Donald F. Baxter Jr. 8-15

A Metal Demand Slowdown, by Donald F. Baxter Jr. 2-17

Plug for Powder Metallurgy, by Donald F. Baxter Jr. 6-25

Role of Microalloyed Steel, by Donald F. Baxter Jr. 4-9

We Are Making Progress, by Donald F. Baxter Jr. 5-26

ELECTRONIC MATERIALS

New Clad Metal Concepts for Electronic Packaging, by Richard A. Campo 3-23

Using Nitrogen Atmospheres in Glass-to-Metal Sealing, by Jerome

FABRICATION OF COMPOSITE MATERIALS SOURCE BOOK
A Collection of Outstanding Articles from the Technical Literature
American Society for Metals

HOW TO ORDER

Call **1-800-223-1896** (Ohio) or **1-800-368-9800** (Continental USA). These toll-free lines are open 24 hours a day, seven days a week, and are available only to buyers using American Express, MasterCard or VISA, or company purchase order.

OR, send your name and mailing address along with a check or company purchase order to **ASM, Book Order Dept., Metals Park, OH 44073.** Don't forget to include book title and code number. ASM pays shipping and handling charges for prepaid orders in US and Canada. Ohio residents, add 5½ sales tax. International orders, add $5 per item. ASM Members must include their membership number to qualify for discount. (Prices subject to change without notice.)

For additional information, call ASM's Customer Service Dept. at 216/338-5151.

Using polymer-matrix and metal-matrix composites ...

Fabrication of Composite Materials, Source Book

Edited by M.M. Schwartz • 1985 • 432 pages • Illustrated • Indexed • ISBN: 0-87170-198-7 • An ASM Source Book — a collection of outstanding articles from the technical literature. A collection of 29 articles answering practical engineering questions about manufacturing operations using composite materials. New uses of polymer-reinforced (PMC) and metal-reinforced matrix (MMC) composites are covered. A general overview section introduces the subject with an article about making products from composites. This overview section also has information on refractory metal wires, super-hybrid composites and silicon carbide fiber/titanium composites. Joining, trimming and cutting, painting, drilling and machining are covered in separate sections. Some of the processes described are waterjet cutting, eutectic bonding of boron-aluminum structural components, corrosion protection for graphite fiber reinforced Al alloys, ultrasonically assisted metal removal, and innovative manufacturing for automated drilling operations. New developments in working with kevlar aramid fiber and boron-epoxy composites are also presented. Engineers should look to this book as the means of expanding their knowledge and thus their potential use of composite fabrication methods. **Order #6235**

ASM Member: $43.20 **List Price: $54.00**
